Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes to prepare
- 1 hour to collaborate
- 2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⏱ 10 minutes

Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

Open article →

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your session.

⏱ 5 minutes

PROBLEM
How might we Predict the Kidney disease

Key rules of brainstorming
To run a smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

⏱ 10 minutes

TIP
You can select a sticky note and hit the pencil (pencil to sketch) icon to start drawing!

Vibha VK

- Collection of blood samples data
- Representing the test data samples on data sheet
- Collection other kidney releated test samples
- ordering the collected samples on data sheet

Yuvan Arvind

- Ordering the collected samples based on risk priority
- splitting the dataset based on kidney disease cause
- splitting the data set and determining accordingly
- categorizing the data based on sex,age
- Storing the collected sample information on cloud

Shalini P

- separating the dataset as trained set and testing set
- training set was applied to fit the parameters
- part of training set was used for validation
- Visualizing the data by plotting the inputs

Kavya Hariharan

- Statistically graphing the data based on test samples
- Analyzing the test results for intermediate or advanced level treatment
- Analyzing the data for individual if needed
- Analyzing the test results for beginner level treatment

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

⏱ 20 minutes

Collection

- Collection of blood samples data
- Collection other kidney releated test samples
- Representing the test data samples on data sheet
- ordering the collected samples on data sheet

Dataset updation

- splitting the dataset based on kidney diasease cause
- Ordering the collected samples based on risk priority
- categorizing the data based on sex,age
- splitting the data set and determining accordingly
- Storing the collected sample information on cloud

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Dataset process

- separating the dataset as trained set and testing set
- training set was applied to fit the parameters.
- part of training set was used for validation
- Visualizing the data by plotting the inputs

Data analyzing

- Statistically graphing the data based on test samples
- Analyzing the data for individual if needed
- Analyzing the test results for beginner level treatment
- Analyzing the test results for intermediate or advanced level treatment

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⏱ 20 minutes

Importance — A sum of these tasks could get done without any difficulty or cost, which would have the most positive impact?

Feasibility — Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

TIP
Plots points can vary their cursors to point at others sticky notes should go on the grid. The facilitator can scroll to the spot by using the laser pointer holding the M key on the keyboard.

- Ordering the collected samples based on risk priority
- Visualizing the data by plotting the inputs
- Statistically graphing the data based on test samples
- Analyzing the data for individual if needed
- splitting the dataset based on liver disease cause
- splitting the data set and determining accordingly
- Representing the test data samples on data sheet
- categorizing the data based on sex,age
- Storing the collected sample information on cloud

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint
Define the components of a new idea or strategy.
